About Our Company

Adak Eagle Enterprises, LLC started out as the Adak Telephone Utility in November 2004. It is a minority and veteran owned company which does business on the Island of Adak. The island is part of the Aleutian chain and serves as a single exchange for the residents. The company is headquartered in Anchorage, Alaska, which is approximately 1,200 miles east of Adak Island. The island was used by the US Military from the 1940s until it was shut down as part of the base reassignment and closures in 1996.

When the Navy controlled Adak Island, it also controlled all telecommunications there. In fact, the Regulatory Commission of Alaska (RCA) and Alaska Public Utilities Commission never certified the area, and no other local exchange carrier provides or ever provided service to Adak. Two carriers, GCI and AT&T Alascom, presently provide inter- and intra-state telecommunication services on Adak, via satellite. Although the facilities were originally built to serve Navy requirements, both companies provide long distance service to the Island of Adak and have committed to continue doing so.

Adak Eagle Enterprises, LLC (AEE) provides all of the telecommunication services on Adak, including IPTV, Broadband, and Cellular. In November 2006, AEE replaced all copper facilities with Fiber Optic to the premises and central office. In October 2008, AEE launched cellular service for Adak and the surrounding area. AEE strives to provide the most reliable and well-rounded telecommunications services for Adak.

AT&T Alascom satellite earth station and GCI's satellite earth station provide satellite delivery of telecommunications traffic, and are the only active routes off the island for long-distance telephone. On November 11, 2006, AEE's new T-7000 switch replaced the old PBX system the Navy left behind.

Adak Eagle Enterprises, LLC (AEE) is proud to provide leading edge ISP services to both the City of Adak – the most western city in the United States – and Adak Island itself.

MISSION STATEMENT

To be true to our customer's culture, promote innovation, and to employ fast-changing technology to meet the needs of the community.
