In this document, the terms "you" and "your" refer to customers of Adak Eagle Enterprises (WCB) Internet Access Service. The terms "we" and "our" refer to Adak Eagle Enterprises LLC dba: Windy City LLC (WCB) Internet Access Service.

Definitions

Service – Internet access purchased from WCB. This includes connectivity from your equipment at your premises to the Internet equipment at WCB's office, connection of WCB's equipment to the Internet, and WCB's equipment that is used to route and manage your traffic to and from the Internet and to provide you with services such as e-mail, web surfing, file transfer, Internet video, and others.

Bandwidth – The amount of data per second. This may be thought of as the "pipe" that carries Internet traffic.

Bandwidth capacity is the amount of bandwidth that we or another network provider makes available for your use, such as the amount of data that can be sent over a wire or fiber optic system.

Bandwidth demand is the amount of bandwidth that a customer wants to use.

Congestion – A situation where the total bandwidth demand (in bits of information per second) on a component of the Internet, including on any part of our network, exceeds the bandwidth capacity of that component to such an extent that traffic flow and service experiences degradation. Congestion is usually of a transitory nature, however, in some cases, such as an extremely popular website, it may last for a significant period.

Degradation of Service - Less than optimal performance of Internet services. This may appear to you as slow response on web sites and e-mail or distorted or frozen video.

Nominal Bandwidth – The bandwidth of the service package you purchase. This is your maximum allowed bandwidth.

Terms of Service and Network Management Practices

The bandwidth you purchase (your service package or nominal bandwidth) is the MAXIMUM bandwidth available to you. Unless you have purchased a Committed Bandwidth service that specifically guarantees a fixed bandwidth, such as a T-1 circuit, it is not a guaranteed bandwidth. WCB will make its best effort to transmit your data in a timely fashion, however, WCB does not guarantee you that you will be able

to use your entire nominal bandwidth at any given time. This is referred to as "best effort" service.

WCB strives to make your total nominal bandwidth available for you to use within our network. CLIENT cannot control bandwidth available, congestion, or service quality on those parts of the Internet beyond our network.

When other customers use our network, you may not be able to use your maximum nominal bandwidth because all customers share total bandwidth capacity at some points on our network and on the Internet. If the bandwidth demand of all customers at that network location exceeds the bandwidth capacity provided, you may not be able to use your entire nominal bandwidth. All services other than Committed Bandwidth services are "shared services" used by many customers.

We size our Internet services by the bandwidth of all our customers, including your service, based on best-of-breed engineering practices. Service is provided equally to all customers, and every customer's data has an equal chance to be served.

On a downstream basis (Internet to customer), service is provided equally to all customers, Internet services, protocols, and sources or destinations on the Internet such as websites, e-mail servers, etc.

Due to limited bandwidth capacity on an upstream basis (customer to Internet), service is provided equally to all customers, protocols, and sources or destinations on the Internet such as websites, e-mail servers, etc. except that service types are prioritized to provide the best service possible to all customers. We prioritize services with streaming video being the highest priority, then web browsing, then all other services. Service is not prioritized by customer or source or destination on the Internet. No services, protocols, or legal sources and destinations on the Internet are blocked under any circumstances. Any effects on service may only be noticeable in times of significant congestion.

WCB may block any service, protocol, source, or destination that WCB determines to be illegal or a threat to life, property, or national security, or if ordered to block or otherwise modify your data by law enforcement agencies,

At this time, WCB does not implement network management techniques when congestion occurs, however, in times of congestion on WCB's network, WCB may, at its sole discretion, implement reasonable network management techniques to protect the services of all of WCB's customers so that each customer has adequate service quality. WCB will not implement network management if degradation of service is caused by congestion on portions of the Internet outside of WCB's network. WCB will notify our customers on this website of changes to our network management policy.

Devices & Software that may be Attached to WCB's Internet Access Service

There are no restrictions on types of devices you may connect to WCB's network other than that they must be approved by the Federal Communications Commission (FCC) for use in the US telecommunications network. You may not connect any equipment to WCB's network that is not approved by the FCC. Most commercially available equipment such as modems, routers, and PCs are approved. All equipment approved by the FCC will have a label stating that it is approved and what the type of the approval is. This information is also found in the user's manual or printed instructions that are provided with the equipment and may be found online at the manufacturer's website. You should read this label whenever you buy any equipment you wish to connect to WCB's network. If you have questions about any particular equipment, please call us at **1-888-328-4222**.

WCB's Internet access service is designed to function with accepted industry standard interface software such as provided by Microsoft, Apple, and others. If you use a type of software not widely used in the worldwide Internet, you may experience some problems with compatibility between your software and WCB's Internet access service. If you have any questions, please call us on 1-888-328-4222, and we will try to help you resolve this problem. It is the customer's responsibility to assure that their software and operating interfaces conform to industry accepted specifications.

Network Security

WCB uses the latest industry-best-practices to maintain integrity and security of its network. This may include security protections that interfere with some types of customer traffic. If you believe your services are being disrupted by our security systems, please contact us on 1-888-328-4222.

WCB provides a level of protection for your computers from spam, viruses, and other malicious or unwanted items. While WCB strives to provide the best protection possible for your computer, we make no guarantees that we can prevent all malicious or unwanted items from accessing your computer. It is the customer's responsibility to protect their computers and other devices from unwanted or harmful items. It is very strongly recommended that you provide your own virus and malware protection, spam filtering, and firewall software, solutions are available on the WCB website.

There are additional considerations regarding Internet security related to WCB's Internet access service. Please see the terms and conditions on page five of your [WCB Application for Service](#).

Services WCB Offers

WCB offers the following Internet access services. The bandwidths listed are the maximum bandwidth of the service. You will not be provided additional bandwidth above what you purchased, even for short periods of time. You are not permitted to "burst" traffic above your purchased bandwidth. ADSL packages may be upgraded to a maximum of **512kb upload for an additional monthly fee.**

Best Effort Services	Maximum Downstream Bandwidth	Maximum Upstream Bandwidth
ADSL		
Residential Silver	256kb	128kb
Residential Gold	384kb	256kb
Res. Platinum	512kb	256kb
Business Silver	384kb	256kb
Business Gold	512kb	256kb
Bus. Platinum	512kb	512kb
Pre Paid Basic	256kb	128kb
Pre Paid Premium	512kb	256kb
3-Day Pre Paid	256kb	128kb
7-Day Pre Paid	256kb	128kb
Committed Bandwidth	Maximum Downstream Bandwidth	Maximum Upstream Bandwidth
ADSL		
Dedicated A	512kb	256kb
Dedicated B	512kb	256kb
Dedicated C	512kb	512kb
Dedicated D	512kb	512kb
Ethernet		
1 - 100Mb	1 - 100Mb	1 - 100Mb

Use of WCB's Services for Real-Time Applications such as Streaming Video

The Best Effort services above may be suitable for real-time applications if the customer has purchased adequate bandwidth for that service. Disruption during times

of congestion, if any, which you experience, will be minimized if you purchase adequate bandwidth for the services you wish to use. However, since there are occasionally conditions of extreme congestion at various points in the Internet, including WCB's network, unless you have purchased a Committed Bandwidth service that specifically guarantees a fixed bandwidth, such as a T-1 circuit, WCB does not guarantee that your service will never be degraded.

Note that bandwidth requirements will differ by real-time application. For example, video such as that offered by various services such as YouTube may require somewhat less total bandwidth than entertainment quality streaming video. Bandwidth requirements may also differ among providers.

Privacy of Customer Information

WCB inspects packets of data you send or receive over our network to allow us to route and, where applicable, prioritize data. We inspect only the packet headers which tell us where to send your data and the type of data it is, i.e.: web surf, video, file transfer, etc.

WCB does not examine the content of your data, i.e.: the data which you send or receive, such as the messages from and to e-mail addresses of your e-mail, which web sites you visit, the sources of your video, or the contents of files you send or receive.

WCB does not store your data, or sell or reveal it to any third parties.

WCB may provide any of your data, both on an active, real time basis and stored data such as your billing records, to law enforcement under appropriate legal orders if law enforcement requests your information in matters dealing with illegal acts or a threat to life, property, or national security.
